

# Representation Trajectories

## Line Shape Score

For  $i = 1, \dots, L$ :

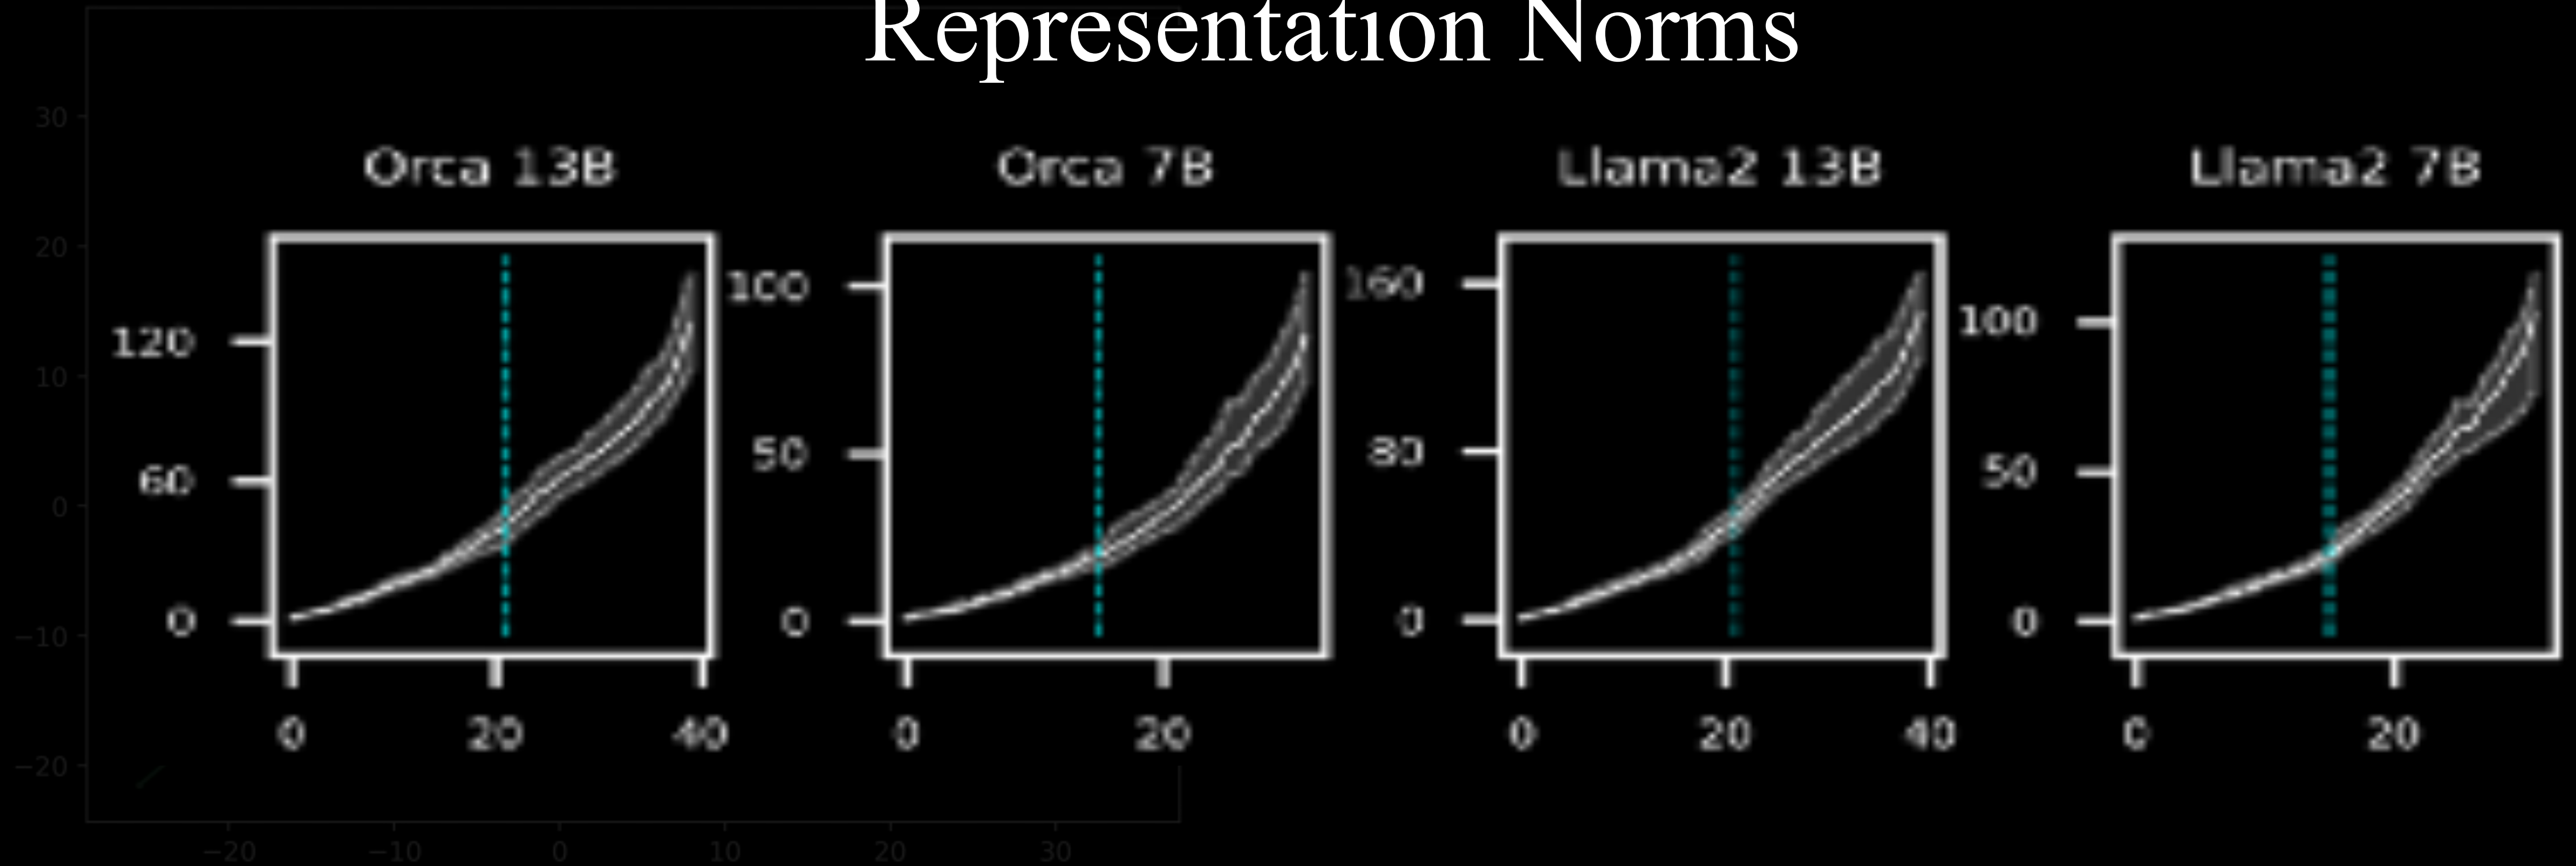

$$\tilde{x}_i^l = \tilde{x}_i^{l-1} + \frac{x_i^l - x_i^{l-1}}{\underbrace{\|x_i^l - x_i^{l-1}\|_2}_{\text{Normalized residual}}}$$

Normalized residual

$$\text{LSS}_i^{0, \dots, L} = \frac{L}{\|\tilde{x}_i^L - \tilde{x}_i^0\|_2}$$
