

PAC-NeRF: Model Architecture

Geometry Seeding

Rather than rendering at $\mathcal{F}^G(t_0)$,

$$G2P \rightarrow P2G$$

Ensures consistent set of particles

$$\mathcal{L}_{\text{surf}} = \sum_p \text{clamp}(\alpha_p, 10^{-4}, 10^{-1}) \left(\frac{\Delta x}{2} \right)^2$$

↪ Minimizes surface area

Without surface regularizer

With surface regularizer
