

D-NeRF: Implementation Details

$$C(\mathbf{r}) = \int_{h_n}^{h_f} T(h, t) \sigma(\mathbf{p}(h, t)) \mathbf{c}(\mathbf{p}(h, t), \mathbf{d}) dh$$

$$\mathcal{L} = \frac{1}{|\mathcal{R}|} \sum_{\mathbf{r} \in \mathcal{R}} \|\hat{C}_c(\mathbf{r}) - C(\mathbf{r})\|_2^2$$

D-NeRF: Examples
