

Static Voxel NeRF

Random sampling

G2P

PAC-NeRF: P2G $\leftrightarrow$ G2P

NeRF uses Eulerian Field

Eulerian Grid

$$\mathcal{F}_p^P \approx \sum_i w_{ip} \mathcal{F}_i^G$$

$p \sim$ particles

$w \sim$ weights

Used for rendering

MPM uses Lagrangian Field

Lagrangian Grid

$$\mathcal{F}_i^G \approx \frac{\sum_p w_{ip} \mathcal{F}_p^P}{\sum_p w_{ip}}$$

Barycentric Interpolation

Used for advection process
